

Year 5 - Working At Home – Summer 2 – Week 5 - Commences on 29th June 2020

Wider curriculum work continues to be the same across the year groups. Set days have been made for the use of Keyworker children so that activities are not repeated between home and school. Additionally, the English now matches across the school, meaning this can be completed with siblings too. There might be slight tweaks from year groups to match the level aimed at. We want to encourage the children to send over any school work or alternate activities at home that they are proud so that we can continue to send feedback and send comments over to them.

We understand that some of this still might be a lot to achieve, please continue to keep in touch with us for support and we will reply as soon as we can.
