

Orangutans

The features of these wonderful creatures

These amazing creatures have many special things about them like they can grow 3 times the size of a human or they can hold onto a branch with their hands and feet because as well having toes on their hands they also have toes on their feet!!! These animals are super intelligent and they imitate people so they can do things like wash clothes or saw up wood. Isn't that amazing!!

Location

These magnificent animals can be found in the massive rainforests of Sumatra and Borneo

Diet

They eat 400 different foods like fruit, honey, nut, leaf, eggs, and bark

Habitat

These creatures live in the emergent layer of the forest
