

How does Evolution happen?

Which knowledge will I learn?

- Recap: What can we learn from fossils?
- Recap: How are fossils formed?
- What are inherited characteristics?
- How does natural selection work?
- What are the theories of evolution?

What skills will I use?

- Recording findings on labelled diagrams
- Using results to draw conclusions
- Examining evidence and considering the degree of trust in theories
- Presenting research

Vocabulary

evolution, natural selection, population, variation, competition, adapted, offspring, inheritance, Charles Darwin, HMS Beagle, Lamarck

What questions do you have?
