

**Dear Mr W. Irish,**

**I am writing to you because I feel that Chandlers Ford should have a twin town. The reason for this is to promote each location's culture and create a commercial tie. As you may know, Eastleigh has two twin towns in France and Germany.**

**Firstly, Chandlers Ford is a residential area with green, wooded areas and nature reserves. Lakes and waterways run through Chandlers Ford. We have a local industrial centre which thrives economically and we are surrounded by farmland. In Chandlers Ford there is also a train line and bus routes linking with other local areas.**

**The first town I have considered is Kopavogur in Iceland. We have a similar population and both have a residential area and an industrial area with excellent schools and pre-schools. The beautiful water is a feature of the two towns, but as lakes and rivers in Chandlers Ford and the sea in Kopavogur. They are thriving economically in Kopavogur just like we are in Chandlers Ford. Some similarities on the geographical side of things include that we both have hills, but neither of us have mountains.**

**My next possibility is Sorrento in Italy. We have similar populations and both have a residential area and a shopping area central to the town. Both of us have a train line and bus network connecting to local cities. Just like in Kopavogur water is a feature, but as lakes and rivers in Chandlers Ford and the sea in Sorrento. Sorrento sits on a hill as does Chandlers Ford (but ours is much smaller). Sorrento has a thriving economy just like ours.**

**In conclusion, choosing a twin town would be beneficial and would help promote trading and tourism. I hope you consider choosing a twin town for Chandlers Ford.**

**Yours sincerely,**

**Harriet**

Dear Mr W. Irish,

I am writing to you to explain why I believe that Chandlers Ford should have a twin town as I feel that it would be hugely beneficial for both towns. In my mind Chandlers Ford is lacking environmental initiative. In this situation, I would strongly advise you to try to make Chandlers Ford a twin town with one of the following towns so we can promote and work together on environmental issues and how to tackle them, build a stronger community and to trade ideas about how we can be more eco-friendly in our community - as flying half way across the earth for holidays and business is not a sustainable thing to do.

Firstly, Chandlers Ford has an average temperature of 11 degrees Celsius and a population of 21,436. It has the following physical features: the Monks Brook River running through it; lots of trees and residential areas; a stately home on the outskirts of Chandlers Ford; a broad and interesting history, including links to World War II; and, Hiltisbury Lakes and other natural and wooded areas. The economy would also benefit from being able to trade crops that we grow and would encourage more farms to spring up.

If you were to twin Chandlers Ford I would appreciate it if you could consider Chandlers Ford's twin one of the two options below, the first of which is Kopavogur, Iceland. It has a population of 37,959, fairly near our population of 21,436, and an average temperature of 9 degrees Celsius, close to our average temperature of 11 degrees Celsius. In addition to this, Kopavogur has a shared goal of placing emphasis on a fine life for all residents, efficient and responsible operations as well as a strong business community. As I may have mentioned earlier, I believe Chandlers Ford may benefit from a shared goal like this. Kopavogur is also on the outskirts of Reykjavik just like we are on the outskirts of Southampton.

The option is Salzburg, Austria, it has a population of 156,872 and an average temperature of 18.5 degrees Celsius. It has a river running through it and also has links to World War II. It has an airport and lots of industry as well.

I really hope you consider finding a twin town for Chandlers Ford,

Yours sincerely, Anya

**Dear Mr W. Irish,**

**I am writing to Inform you of the reasons why I think you should consider giving Chandlers Ford a twin town. I think that it would be beneficial for both towns. As you may know we have left the EU but a twin town will give us more options, as they exist to encourage trade and tourism.**

**Firstly, chandlers ford is known for its river - the Monks Brook. I can also inform you that we have two motorways (the M3 and the M27) and inner and outer town shopping, as we are just round the corner from Southampton. Interestingly, we have industrial, residential and commercial land use such as school lane industrial estate and an example of commercial land uses are Draper tools and Armid tea. As well as this, we have some more physical geographical features such as the Hiltingbury Lakes and Nature reserves.**

**Secondly, I think we should twin with Salzburg, Austria in Europe. As you might already know, it is landlocked but makes up for its lack of coast by its beautiful nature and the glimmering River Salzach. I think we are very similar because we have the Monks Brook and Salzburg has the river Salzach. In addition, we have the Hilting bury Lake and Salzburg has Lake Mondsee. Salzburg has some great stories to tell as this was the birthplace of the great composer Mozart who learned to play the piano at the young age of three. On the other hand we have the story of King Rufus. Salzburg has industrial and residential land use. The most popular example of industrial land use is retail.**

**In conclusion, I believe that Chandlers Ford will be a great twin town with Salzburg**

**Yours faithfully, Eleanor**

Dear Mr W. Irish,

I am writing to you because I believe that Chandlers Ford should have a twin town as it would give both towns more tourism and trading opportunity. You may already know, Eastleigh has two twin towns in France and Germany. But it is my opinion that Chandlers Ford itself should have one. It would give both towns more tourism and trading opportunities.

Firstly Chandlers Ford has a lot of family friendly features, for example, there are many parks and open fields for adults, children and pets. The town has several different areas including residential, commercial and industrial buildings. Furthermore, Chandlers Ford has bustling and busy streets and shops which has created a strong economy.

I think Chandlers Ford should twin with Kopavogur which is in Iceland. Kopavogur has a similar population as Chandlers Ford 37,959 and 21,436. Other similarities are the land use, such as grocery, stationery and sports shops. They also have many houses and fast food buildings. Besides all the similarities they also have a colder temperature and the region is mountainous which a nice variety is.

My final reason why I think Chandlers Ford should twin with Kopavogur is it would give people encouragement to travel to both towns. It would make an even stronger economy. I hope you agree with me and make Chandlers Ford a twin town with Kopavogur.

Yours sincerely  
Georgia

Dear Mr W. Irish,

I am writing to you that I think that Chandler's Ford needs a twin Town and it makes some great bonuses. Firstly, we could twin with either Kopavogur (Iceland), Sorrento (Italy) or Salzburg (Austria). Any of these could be a twin town, but there are only a few that could be with Chandler's Ford which might be for population similarities, rivers, businesses, residential areas and the list just go on and on. Also, I think Chandler's Ford should be twinned because it would advance popularity and increase trading so we would have much more supplies.

Firstly, there is Sorrento which has a similar temperature and has a lot of businesses just like Chandler's Ford. Also it has a few fields although Chandler's Ford doesn't have any fields so it isn't that similar to Chandler's Ford and they wouldn't make very good twin towns.

Secondly, there is Salzburg which has a residential area just like Chandler's Ford and a river like us in Chandler's Ford but also a similar temperature but not much else. Therefore they would make okay twin towns but not as much as the next place...

But I think Chandler's Ford should be twinned with Kopavogur because it has a similar popularity to Chandler's Ford and it also has businesses like Chandler's Ford as well as residential areas which both places have or include also, rivers which they both have. Although they don't have that similar temperatures. They are also the most similar.

Yours Sincerely,

Samuel

Dear Mr W. Irish,

I am writing to you because I think Chandler`s Ford should have a twin town. If Chandler`s Ford had a twin town it would help with tourism and trade.

Firstly Chandler`s Ford is unique with its features. It some physical feature like the Monk`s Brook and Hiltonbury lakes. As Well as the physical features it has geographical ones and good land use. Chandler`s Ford use`s its land for residents, commercial and industrial.

The first town we could twin with is Kopavogur because we have a similar land use. Kopavogur is residential and industrial like we are. It has a similar popularity of 37,959 to our 21,436. Although there is one difference Kopavogur is on the coastline.

Another place we could twin with is Salzburg in Austria. Like us Salzburg has a river running through the middle of the town like we do. We have a similar weather as well of rain and sun. it also has residential, commercial and industrial area.

Please could you consider twinning us to one of the towns above. Don't forget it would be good for the shops because of the trade.

Yours faithfully

Charlie

Dear Mr W. Irish,

I am writing to you because I believe that if Chandler's Ford had a twin town, both our town and our twin would greatly benefit. I think that it would help industry, promote trade, and increase population. It could also increase our finances as it would greatly affect tourism.

Chandler's Ford is a unique place for an impressive list of reasons. It not only has stunning natural beauty, but is the largest village in England! The views are incredible and because of places like Hiltingbury lakes, it has become a lovely place to live in. The river Monks Brook scenically runs through the village. It has a lot of forest and the sights to see are incredible. The land is not used wastefully, as Chandler's Ford has a healthy blend of Residential, Commercial and Industrial land. This is why it would be a great place to twin with.

I believe we could twin with Kopavogur, Iceland, as it has lots of industry and business. It also has a similar population of 37,959. (we at Chandler's Ford have a population of 21,436) Both of our towns are rural and scenic areas that have a large amount of forest. They have a large hill named Culture hill, whilst Chandler's Ford has Saint Catherine's hill. However a quite large difference is it is a town, and we are a village.

I think somewhere else we could twin with is Salzburg, Austria, which has a river running through town named Salzach. Chandler's ford, It has the Monk's brook running through it. Salzburg has stunning architecture, and like us, has a large hill of Cultural importance. They have Hohensalzburg fortress, and we have Saint Catherine's hill. Their Population is over five times the size of ours, but that would be useful as it would mean more people would come to Chandlers Ford.

In conclusion, I think we should become a twin town with Salzburg to improve the bond between England and Austria and to encourage trade and tourism. If you agree, Mr Irish, then please send a letter to the board of Salzburg.

Your faithfully,  
Jude

Dear Mr W. Irish,

I am writing to you because I believe that Chandlers Ford should have a twin town. Also I feel that it could help and be good for tourism and trade. As you may know Eastleigh has already got two twin towns and it would only be fair if we had one too.

Firstly, Chandlers Ford which is my local area, has many different features that make it unique. It has Fryer Arcade which is a commercial land with many shops. Additionally, we also have a very nice area called Hiltinbury lakes which would be a wonderful place for tourists. It also has physical features such as, Monks Brook River that runs all the way through the town. Chandlers Ford also has many residential areas, commercial land and Industrial land.

Specifically, I think that Kopavogur (town in Iceland) would be a perfect twin town for Chandlers Ford because they have similar population, Chandlers Ford: 21,436  
Kopavogur: 37,959. Also Kopavogur is residential land.

On the other hand, there is also Salzburg which would also be a great twin town because we both have residential land along with flats, shops and forests. However Salzburgs population is alot bigger than ours.

In conclusion, I think that Kopavogur would be the better twin town. I hope you consider this.

yours faithfully,

Dear Mr W. Irish

I'm writing to you because I would like you to consider giving Chandlers Ford a twin town. We should do this as it would give us more tourists and better trade. As you may already know Eastleigh has two twin towns so it is only fair we have one too.

Firstly Chandlers Ford has a river running all the way through it. We also have a beautiful lake full of ducks. Chandlers Ford has many residential areas along side our most known commercial area Friary arcade. As you can see Chandlers Ford is a unique place and that is why I think we should twin with another town.

One city we could twin town with is Kopavogur in Iceland. I think we have a similar population of 37,959 and 21,436. We also both have many woodland areas. Kopavogur also has many lakes and rivers. However this is the second largest town in Iceland. These are all reasons why Kopavogur is a good town to twin with.

My next suggestion is Sorrento in Italy because it has many forests and businesses just like us. Although Sorrento has many cliffs it is a beautiful old fashioned town.

In conclusion I think we should twin town with Kopavogur because of all the reasons above. Please write back.
