

Merdon Junior School

Year 5 Home Learning

To infinity and beyond

Your child should pick one task over the half term to complete. These tasks have been compiled using the children’s own suggestions, so we hope that this is an enjoyable experience for you and your child!

It is your child’s choice which activity they choose. They should spend some time to be creative and thoughtful in their approach and presentation. We have talked over ideas with your child about how they can be more independent in their approach to their learning. We would ask that Home Learning should be completed with care, and this should be reflected in what they present/create. (No bigger than A3 please). Please feel free to give your child support and ideas with these tasks.

- Write a Space Poem.
- Produce a fact file on a planet or an astronaut.
- Design a new planet to enter the solar system.
- Write a song or poem about our universe.
- Investigate which animals have travelled into space.
- Research the moon.
- Create a game about Space travel.
- Explore which countries have sent rockets into space.
- Create a model planet or rocket.
- Write a biography about Tim Peake
- Make a model of the International Space Station
- Make a Moon Diary
- If you have an idea that is not on the list, then please use this option to complete an activity of your own choice!

We can’t wait to see your plans next week and remember that your Home Learning needs to be completed by Monday 10th December.
