

This week we have been learning to solve fractions problems using the four operations where the fractions have different denominators.

To support our learning this week, we would like the children to complete the following calculations:

Complete the following fractions to make the fractions equivalent.

1. $\frac{1}{2} = \frac{\square}{8}$	2. $\frac{3}{\square} = \frac{6}{10}$	3. $\frac{3}{4} = \frac{12}{\square}$	4. $\frac{\square}{10} = \frac{1}{2}$
5. $\frac{7}{\square} = \frac{14}{16}$	6. $\frac{2}{3} = \frac{\square}{12}$	7. $\frac{\square}{6} = \frac{4}{24}$	8. $\frac{1}{8} = \frac{2}{\square}$
9. $\frac{2}{10} = \frac{\square}{5}$	10. $\frac{2}{\square} = \frac{1}{3}$	11. $\frac{4}{5} = \frac{16}{\square}$	12. $\frac{\square}{16} = \frac{1}{4}$

Each pair of blocks totals the block above them. Use addition and subtraction to fill in the missing fractions and complete the steps.

Our rock star times tables focus for next week will be the 6 times table.

Due to many of you asking if we can provide times tables practise for the children, this can now be found below.

Please note this is in addition to the normal maths homework and should be completed at your discretion.
