

English Homework

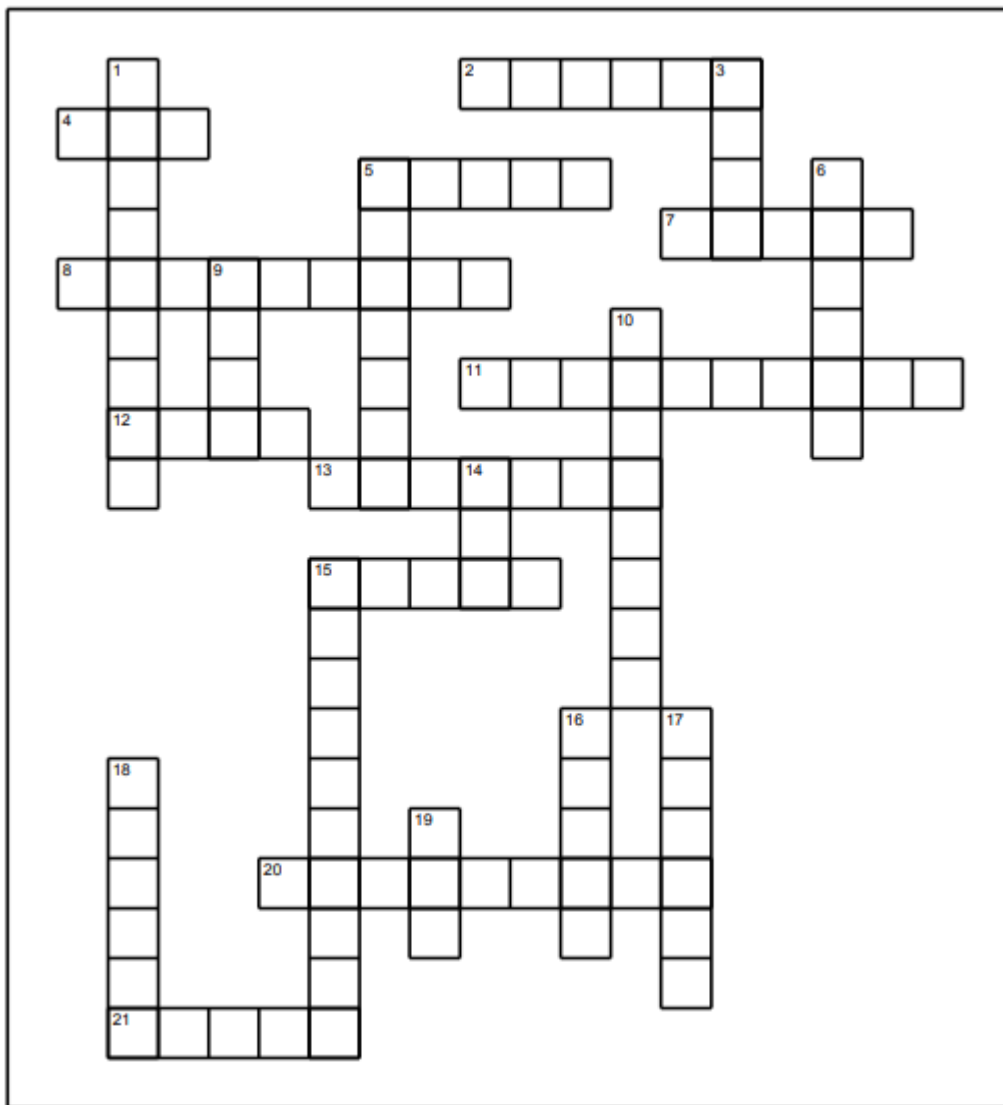

Date set 6.6.18 Due in 11.6.18

Match the words to the definition.

banks		this is a smaller river that flows into a main river.
brackish		this is the beginning (start) of a river.
channel		this is where material is laid down in another location
current		this is a sudden drop in a river where the river meets softer rock lying over harder rock.
delta		- this is where eroded material is moved downstream by the flowing water.
deposition		this is a mixture of salt water and fresh water.
erosion		this is a large body of water that usually empties into an ocean or sea.
estuary		this is the process where material is removed from one area and transported to another
floodplain		this is a man-made structure that stores fresh water for human use.
meander		this is the area where a river meets the ocean or sea, causing fresh and salt water to mix together.
mouth		this is the bottom of a river.
ox-bow lake		this is where a river ends, either in the ocean, sea or lake.
plunge pool		these are the sides of a river that the water normally flows through.
rapid		this is a meander that was cut off from a river and abandoned.
reservoir		this is a large, silty area found at the mouth of a river. Deltas are often triangular
river		this is a deep pool below a waterfall.
river bed		this is when a river flows quickly and the currents swirl around.
sediment		this is the movement or flow of water.
source		this is a bend or curve in a river
transportation		this is a mixture of small particles of soil and rock.
tributary		this is the flat area next to a river that floods.
waterfall		this is the path that a river takes over land.

Learn the words you will be tested on some of them next week.

Parent feedback

Across
