

Art in the Style of Andy Warhol

1. Lightly, draw a grid on your page. Mine is A5; half an A4 page.
If you are going to paint, you might want to use a bigger page.

5. With a steady hand, you could try outlining your image too.

2. Draw a simple outline picture in the first section on your page. I chose a chocolate bar wrapper.

6. Colour the other sections, choosing different colours for each picture.

3. Carefully, copy the image into all of the other sections. You could use tracing paper if you have it but you don't need to.

7. You could choose an animal or a monster.

4. Choose the colours to use in your first section and, neatly, colour it. You could use pencils, crayons or paint. I chose realistic colours here.

8. You could choose food like a cupcake.

We look forward to seeing your wonderful creations.
