L.O: To calculate the length of sides using the perimeter.

Easier:

Perimeter = 36cm

The shape has ___ sides so we divide the perimeter by ___

$$\underline{\quad} \div \underline{\quad} = \underline{\quad}$$

Perimeter = 48cm

The shape has ___ sides so we divide the perimeter by ___

$$\underline{\quad} \div \underline{\quad} = \underline{\quad}$$

Perimeter = 25 cm

The shape has ___ sides so we divide the perimeter by ___

$$\underline{\quad} \div \underline{\quad} = \underline{\quad}$$

Perimeter = 60cm

The shape has ___ sides so we divide the perimeter by ___

$$\underline{\quad} \div \underline{\quad} = \underline{\quad}$$

Medium:

Harder:

Find the length of the side of each shape.

Perimeter = 51cm

$$\underline{\quad} \div \underline{\quad} = \underline{\quad}$$

Perimeter = 84cm

$$\underline{\quad} \div \underline{\quad} = \underline{\quad}$$

Perimeter = 95cm

$$\underline{\quad} \div \underline{\quad} = \underline{\quad}$$

Perimeter = 90cm

$$\underline{\quad} \div \underline{\quad} = \underline{\quad}$$

Perimeter = 144cm

$$\underline{\quad} \div \underline{\quad} = \underline{\quad}$$

Perimeter = 75cm

$$\underline{\quad} \div \underline{\quad} = \underline{\quad}$$

Perimeter = 452cm

$$\underline{\quad} \div \underline{\quad} = \underline{\quad}$$

Perimeter = 215cm

$$\underline{\quad} \div \underline{\quad} = \underline{\quad}$$

Perimeter = 348cm

$$\underline{\quad} \div \underline{\quad} = \underline{\quad}$$

Perimeter = 640cm

$$\underline{\quad} \div \underline{\quad} = \underline{\quad}$$
