

What is light?

You will need to be in a room or an area that is **light now**, but which you can make **dark**.

1. Have a look around the room. What can you see?
2. Make the room as dark as possible. What can you see now?
3. Is there light coming in anywhere? How do you know?
4. Make the room light again. What do you notice?

Watch this clip, then fill in the gaps:
