

Multiplying and converting pence (p) to pounds and pence (£p)

Practise:

(Use a method you are comfortable with to work these out –show your working in your book)

Easier	Trickier
1.) $15p \times 3 = \underline{\quad}p$	1.) $26p \times 4 = \underline{\quad}p = \pounds \underline{\quad}$ and $\underline{\quad}p$
2.) $\pounds 13 \times 4 = \pounds \underline{\quad}$	2.) $32p \times 5 = \underline{\quad}p = \pounds \underline{\quad}$ and $\underline{\quad}p$
3.) $19p \times 5 = \underline{\quad}p$	3.) $\pounds 28 \times 8 = \underline{\quad}p = \pounds \underline{\quad}$ and $\underline{\quad}p$
4.) $\pounds 19 \times 2 = \pounds \underline{\quad}$	4.) $\pounds 1 \text{ and } 50p \times 4 = \underline{\quad}p = \pounds \underline{\quad}$ and $\underline{\quad}p$
5.) $22p \times 3 = \underline{\quad}p$	5.) $\pounds 1 \text{ and } 25p \times 3 = \underline{\quad}p = \pounds \underline{\quad}$ and $\underline{\quad}p$

Problem solving:

1.) I want to buy 4 comics. Each comic costs 27p How much money do I need? $\pounds \underline{\quad} \underline{\quad} p$ 	2.) Miss Gover buys some cupcakes for her friends. Each cupcake costs 38p and she buys 5. How much does she spend? $\pounds \underline{\quad} \underline{\quad} p$ 
3.) Mrs Smith buys some treats for her guinea pigs. Each treat costs 54p and she buys 3. How much money does she spend? $\pounds \underline{\quad} \underline{\quad} p$ 	4.) Mrs Leach is buying plants. She buys 8 plants, each costing 83p each. How much money does she spend? $\pounds \underline{\quad} \underline{\quad} p$ Challenge: How much change does she have from £10? 

Further challenge:

Using your answers to questions 1 -3 above, work out how much change each person will get from £2.00

(Tip: you will have to subtract the total from £2. Will you convert the £2 to 200p?)
