

Subtracting Lengths

Have a go at working through as many levels as you can.

Calculate showing your workings:

Mild

1.)

2.) $89\text{mm} - 45\text{mm}$

4.) $143\text{cm} - 93\text{cm}$

Spicy

- 1.) $6\text{m } 19\text{cm} - 3\text{m}$
- 2.) $9\text{m } 82\text{cm} - 51\text{cm}$
- 3.) $3\text{m } 72\text{cm} - 2\text{m}$
- 4.) $12\text{m } 5\text{cm} - 9\text{m}$

Hot

1.)

$$85\text{ mm} - 2\text{ cm} = \boxed{}\text{ mm}$$

2.) A piece of string is 2m long.

Mrs Smith cuts off 49cm of string.

How much string is there left?

3.) Mrs Leach is making a picture frame.

Her piece of wood is 3m long.

She saws off 86cm of the wood.

How much wood does she have left?

4.)

$$9\text{ cm } 5\text{ mm} - 20\text{ mm} = \boxed{}\text{ cm and } \boxed{}\text{ mm}$$

$$10\text{mm} = 1\text{cm}$$

$$100\text{cm} = 1\text{m}$$
